

Keene Biodiesel Project

Stakeholder(s): The City of Keene Department of Public Works
Keene State College

Project Length: July 1, 2002 – June 30, 2003

Fuel Type: Biodiesel

Description: Two Stakeholders in Keene, New Hampshire are using biodiesel to power all of the diesel engines that refuel at the respective fueling tanks. The City of Keene DPW has been using a B-20 blend in 65 on-road vehicles and 12 off-road vehicles since July 1, 2002.

Keene State College (KSC) is using B-100 in the warmer months (May-September) and a B-20 blend for the colder months. The alternative fuel is being used in 1 on-road vehicle and 11 off-road applications.

Funding for both projects came from the NH Governor's Office of Energy and Community Services, through its Renewable Energy Program and the Granite State Clean Cities Coalition.
